Working Experiences

May 2018 – Now — **Quantic Innovations** — StartUp

Currently working as an external collaborator with the role of developer and project manager on projects related to mobile applications for both iOS and *cross-platform*. The applications developed are related to the management of BLE, BLE Mesh, NFC, and USB communications for electrification systems based on the Modbus industrial protocol.
In addition to mobile development, I recently started working on the development and management of an embedded BLE system based on an *STM32* chip for device operation management and a *BGM123* chip (from Silicon Labs) for managing external communication via BLE and GATT. This project has allowed me to begin gaining familiarity with development environments in C for STM32 and SimplicityStudio. At the same time, I'm developing Windows apps (based on WinForms) on the .NET framework. These apps are used as configuration interfaces for custom low-level embedded systems that implement custom serial protocols. I'm also involved in handling and managing AWS Lambda and AWS IoT Core structures for an IoT project.

March 2016 — **Istituto comprensivo di Rovetta** — Secondary school

I served as a substitute teacher for a short period at the lower-secondary school of Castione della Presolana, in the mathematics and science subject areas.

2012 – 2017 — **Orobica Tecno Impianti** — Chemical plant maintenance

During the summer school break, I worked as a helper in the maintenance of a chemical/aerial plant. This first experience introduced me to workplace dynamics and to learn some manual tasks, such as threading, mounting, and fixing pipe systems.

Education

Studies

2018 – 2021 — **Master's degree in Computer science** — University of Bergamo
Grade: 110/110 with honors

During my master's degree, I explored various areas of Computer Science, ranging from electronics to automatic control, and including modeling and control of mechatronic and robotic systems. I also attended courses related to model identification, data analysis, and the field of Artificial Intelligence, with a focus on IT Security.

2015 – 2018 — **Bachelor's degree in Computer science** — University of Bergamo
Grade: 103/110

The bachelor's degree program included not only a solid foundation in fundamental subjects such as mathematics, physics, and chemistry, but also in-depth studies in compute science (CS, CS 2, Databases and Web, Software Engineering), as well as areas such as automation, electronics, and telecommunications networks.

2010 – 2015 — **High school diploma as electronics technician** — ISISS Valle Seriana
Grade: 100/100

The five-year study path, allowed me to acquire technical knowledge related to theoretical part of electronics and control. I also gained experience in designing and construction of electronic circuits, using laboratory instruments (Multimeters-Power supplies-Oscilloscopes-Function generators). In the last part of the studies, I acquired knowledge related to the Arduino platform and open-source robotic systems.

About me

In March 2021, I completed my master's studies in computer engineering (LM-32) at the **University of Bergamo** and began a collaboration as a *software engineer* at **Quantic Innovations**.
This dual path, spanning approximately 3 years during my studies, has enabled me to cultivate both professional skills and a profound sense of fulfillment. It has reinforced my awareness that engaging in work that sparks my interest and curiosity is what I truly enjoy and wish to pursue with unwavering determination.
In my free time, I relish an outdoor lifestyle, indulging in activities such as hiking and cycling amidst the mountains that surround me daily.

Code skills

- Swift
- Java/Kotlin/Xamarin
- C#
- Python
- Matlab/Simulink
- C/C++
- Scala
- ASMETA
- Cyclone

Technology skills

BLE · BLE Mesh · NFC · Open CV · Azure devops · Modbus · GitHub · XML/JSON · AWS lambda · AWS IoT Core

Summer School

August 2019 — **Introduction to RL** — SDU - Denmark
Intensive two-week course of *Introduction to reinforcement learning for robotics* at *Southern Denmark University - SDU.*

Extra courses

November 2020 - March 2021 — **HC-Lab3** — University of Bergamo
The course, lasting six months, aimed to promote the culture of innovation and entrepreneurship within the context of the Aging Population and Silver Economy. It provided me with the opportunity to use some of the most common tools in entrepreneurship, such as the Business Model Canvas and A/B Testing.

Projects

2020-2021 — **Techniques for monitoring respiration during mechanical ventilation via an artificial neural network** — University of Bergamo
Analysis and research on how CNN is used as a support for the MVM pulmonary respirator control cycle, in a context of adaptive ventilation.

2018 — **Setup of the control system of an industrial manipulator robot** — University of Bergamo
Analysis and research on how to use and set in motion an anthropomorphic manipulator of the ABB family (ABB IRB 120), using proprietary software (RobotStudio).

2015 — **InMoov** — ISISS Valle Seriana
Realization of the In-Moov open-source robotic project as a presentation project for the oral exam.

Distinction

2011–2015 — **Io e Lode** — Confindustria Bergamo
Participated for four consecutive years in the 'Io e Lode' project

April 2015 — **Alfieri del Lavoro** — Milano
Conference *Alfieri del Lavoro*: "Ripartire dal sapere per far ripartire il paese" – sala Montanelli "Corriere della Sera" site – 11 april 2015

2014 — **Media istituto** — ISISS Valle Seriana
Highest average grade in the school during A.S. 13/14

2014 — **Electronics competition** — Brescia
Took part in the national electronics competition.

November 12, 2025 — **Michele Piffari**
